Does a teenager working at the movies really need to spend about 70 cents a day for something that won't be there when he retires?

How about an interior designer trying to pay off her student loans, while spending \$22 a month on other people's education?

What about a doctor who donates freely to charity, but has to also give nearly \$1000 a month for welfare--- even though he has worked hard all his life, while others only work by walking to the mailbox and then walking to the bank???

Oprah could hire 300 people making \$50,000 a year---if her show wasn't ending, that is. Now that's a stimulus package for Chicago!

Imagine if Exxon was able to lower the price of gasoline by 61%. Remember that corporations do not pay taxes! They PASS THEM ON to Uncle Sam after COLLECTING them at the pump!

Look at all this waste! We must be kinder to the successful people in our society, or else they will be productive somewhere else!

Most every line above can be privatized---more efficient, higher quality, and no union goon influence.

People will care about their job performance when it could be THEIR ass on the line this time!
